Highfield Level 2 International Award in **Infection Prevention and Control in Health and Care Settings**

Infection prevention and control is a scientific approach and practical solution designed to prevent harm caused by infection to patients and health workers. It is an essential part of the infrastructure of healthcare.

Who requires this qualification?

It is aimed at anyone needing to develop the underpinning knowledge of how to prevent the spread and control of infection in their workplace or home environment. It is also suitable for employees who require refresher/CPD training or new staff members who work in health and care settings.

What are the entry requirements?

Learners must be 14 years of age or above to register for this qualification. They must also meet the necessary standard of language of the training course.

What topics are covered?

- Common healthcare associated infections
- The chain of infection
- The importance of correct handwashing procedures
- The use of personal protective equipment
- The decontamination processes (cleaning and disinfection)
- Waste management and associated risks
- Management and staff responsibilities, risk assessment and developing a positive infection prevention culture

Why a Highfield qualification?

Highfield are the leading provider of regulated compliance qualifications in the UK, certificating over 350,000 learners a year.
