knowledge test and professional interview

Working as a customer service specialist

The hire sector for plant, tools and equipment (PTE) provides specialist plant, tools, machinery or equipment on short or long-term hire to carry out specific tasks across the construction and other sectors. The type of products hired could range from powered hand tools up to machinery such as excavators or cranes with a qualified operator. Hire sector employers range from small local companies up to large national organisations, although some companies specialise in just one equipment type (such as cranes) and others offer a range of over 2000 products servicing all commercial sectors and domestic customers.

The programme's structure

During this programme, the apprentice will learn a wide range of skills and knowledge in a number of environments. They will be placed in a role over a minimum of a 12-month period, during which they will compile a work record portfolio while being supported on-programme by their assessor. The assessor will review the progress of the apprentice during this period against the standard to ensure they are prepared for the end-point assessment.

Hire Controller (Plant, Tools and Equipment)
Level 2 Apprenticeship Standard

Your learner's journey
